INTRODUCTION

I have had the privilege to learn and implement basic HTML/CSS/JS during my past employment. Ultimately, I decided to extend my knowledge in full stack web development by picking up robust frameworks such as React, Express and MongoDB. By adapting these skillsets, I am able to build and deploy fully functional websites.

TECHNICAL TOOLBOX

◊ HMTL, CSS, JavaScript, React, React Native, Redux, Bootstrap, Node, MongoDB, Nginx, Docker, DigitalOcean

PROJECTS

◊ **Full Stack/MERN applications**
- Skills in leading framework: React to build high-quality, scalable and reusable components for the frontend solutions.
- Integrating third party React libraries and managing Redux store data.
- The Backend use of Node / Express and MongoDB / Mongoose to provide RESTful API.
- Building user registration and authentication system for the security.
- Implementing payment system with Stripe.

Please visit my website https://www.kwans.xyz under Portfolio section for more samples.

EXPERIENCE

Chinese Overseas Marketing, Rosemead, CA   Oct 10 – Apr 20
◊ **Senior Technical and Content Editor**
- Collaborated with designers and database administrators to execute successful contents by maintaining clients' information and advertisements
- Created and improved visual designs to catapult website forward in terms of looks and usability.
- Assisted end users by maintaining and supporting both Windows and Mac-based.
- Improved operations by working with team members and customers to find workable solution.
- Exceed customer satisfaction by finding creative solutions to problems.

EDUCATION

Bachelor Degree in Economics
Simon Fraser University, Burnaby, Canada
